INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2005/003302

Re Item IV Lack of unity of invention

In response to the invitation to restrict or pay additional fees, the applicant has amended and restricted the claims. This Authority considers that there are 4 inventions covered by the amended claims indicated as follows:

I: Claims 1 (partially), 2-4, 5-10(partially)

A synergistic herbicidal mixture comprising A) Imizamox, B) at least one herbicidal compound of the group of chloracetamides and, if desired, at least one herbicidal compound C) as defined in claim 1, a herbicidal composition comprising the same and a method of controlling undesired vegetation using the same

II: Claims 1(partially), 5-10(partially)

A synergistic herbicidal mixture comprising A) Imizamox, B) at least one herbicidal compound of the group of oxyacetamides and, if desired, at least one herbicidal compound C) as defined in claim 1, a herbicidal composition comprising the same and a method of controlling undesired vegetation using the same

III: Claims 1(partially), 5-10(partially)

A synergistic herbicidal mixture comprising A) Imizamox, B) at least one herbicidal compound of the group of tetrazolinones and, if desired, at least one herbicidal compound C) as defined in claim 1, a herbicidal composition comprising the same and a method of controlling undesired vegetation using the same

IV: Claims 1(partially), 5-10(partially)

A synergistic herbicidal mixture comprising A) Imizamox, B) quinmerac and, if desired, at least one herbicidal compound C) as defined in claim 1, a herbicidal composition comprising the same and a method of controlling undesired vegetation using the same

The common link between the 4 inventions listed above is that they all deal with synergistic herbicidal mixtures comprising an imidazolinone compound, Imizamox. This common concept linking together the 4 inventions is not novel since synergistic herbicidal mixtures

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY International application No.

(SEPARATE SHEET)

PCT/EP2005/003302

containing a benzoylurea of formula I, acetochlor and a mixture of two imidazolinone compounds selected from a list of 6 compounds including Imizamox have been described in D8 (D8= WO 2004/008861) (see D8, p.23, I. 29-37). Thus the technical features of the common concept are not special technical features in the sense of Rule 13(2) PCT. The chemical structures of the compounds B) of the claimed synergistic herbicidal mixtures being widely different, no other technical features can be distinguished, which could possibly fulfil this requirement. Thus there is no single inventive concept underlying the different inventions and the present application lacks unity (Article 34 PCT). Since no additional search fees have been paid, the search has been limited to the first invention identified in the invitation to pay additional fees. Consequently this report has been established in respect of the first subject identified above which corresponds to the first invention identified in the invitation to pay additional search fees wherein the compound A is Imazamox.

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- D6: DATABASE CA [Online] CHEMICAL ABSTRACTS SERVICE, COLUMBUS, OHIO, US; JOHNSON, WILLIAM G. ET AL: "Weed control with reduced rates of imazaquin and imazethapyr in no-till narrow-row soybean (Glycine max)" XP002347126 retrieved from STN Database accession no. 1998:156252
- D7: US-A-5 905 059 (FENDERSON ET AL) 18 May 1999 (1999-05-18)
- D8: WO 2004/008861 A (BASF AKTIENGESELLSCHAFT; KIBLER, ELMAR; O'NEAL, WILLIAM, B; WITSCHEL,) 29 January 2004 (2004-01-29)

Each of documents D1 and D3-D4 dicloses synergistic mixtures of metolachlor with imazethapyr or imazapyr.

The synergism of grass weed control with postemergence combinations of dimethamid and imazethapyr has been described in D2.

D5 dicloses synergistic mixtures of metolachlor with imazaquin.

It is known from D6 that weed control with reduced rates of imazaquin and imazethapyr is obtained in the presence of metolachlor.

It is known from D7 that the co-application of dimethamid with imazethapyr or imazaquin results in a synergistic herbicidal effect.

The objection as to lack of novelty based on each of the documents D1-D7 is not maintained since none of the aforementioned documents dicloses the use of Imizamox.

However, the subject-matter of the amended claims 1-10 lacks novelty (Article 33(2) PCT) in view of D8 which describes synergistically acting herbicidal mixtures herbicidal mixtures containing a benzoylurea of formula I, a chloroacetanilide such metazachlor, metolachlor or dimethenamid or and a mixture of two imidazolinone compounds selected from a list of 6 compounds including Imizamox (see D8, p.23, I. 29-37). It is remarked that the wording

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2005/003302

of the claims "comprising" does not exclude the presence of the compound A of D8.
